To Mr. Bellinger,

I am writing this letter to thank you for developing and producing your Phoenix Thera-lase class 4 cold laser machine.

As you know, I was the biggest skeptic when I began sampling your machine on my patients almost three years ago. The machine sold itself to me. I have been practicing physical therapy since 1999, and I have never seen a modality produce such amazing results in rapid time. I like to tell my patients that the machine is not a “miracle machine” it is a time machine. If you value time, the Pheonix will get you better faster when compared to traditional physical therapy sessions. I have pledged to the communities that I serve, that I will provide them with the best and most efficient physical therapy. Any PT clinic that does not have a class 4 cold laser at this power and wavelength is doing a disservice to the communities that they serve. I am grateful to have the ability to provide the strongest and most powerful healing laser in the country!

Professionally,

James Kalendarian,PT
