To Whom It May Concern:

Hello, my name is Dr. David Bruton Jr., physical therapist and owner of Between the Lines Physical Therapy in Centennial, CO. I am also a Super Bowl 50 Champion and former NFL veteran of 8 years, with 7 of them with the Broncos, and 1 with the Redskins. Being the person on the table of rehabilitation throughout my playing days, and now as a doctor of physical therapy, I believe I have great insight in regards to medical care.

I was fortunate enough to have the Phoenix Thera-Lase sent to the clinic for a couple of weeks and see how this higher wattage, non-invasive cold laser works, and most importantly, see how my patients would like it and respond. To say it didn't disappoint is an understatement. I would receive texts the next morning after someone was treated saying "my swelling has gone down," "I feel more mobility," "I have no pain," and "I think you should purchase that laser." The patients ranged from 9 years old to 42 years old, all involved in athletics in some capacity. I even had some NFL prospects and former NFL players try it out, and they loved it.

A Phoenix Thera-Lase Laser is a game-changer in rehabilitation, recovery, and performance. It allows for reduced time out from sport, work, or life in general with a multitude of musculoskeletal issues, in which I had treated. I can say with complete honesty and transparency, that I believe this laser will be in every major sport team locker and the athletes on those teams will find it beneficial in the short-term and long-term.

Thank you to the creator, Gary Bellinger and his director of operations Debra Pash, for flying to Colorado to demonstrate this amazing tool. They both went above and beyond to ensure my comfortability with using the machine and properly educated me on best practice with the laser and how to use it to be most beneficial to a patient.
